

Costa Mesa Regional Sewer Projects

Sewer Rehabilitation Along the 405

OC San provides wastewater collection, treatment, and recycling services for approximately 2.6 million people in central and northwest Orange County. The OC San Costa Mesa Sewer Rehabilitation along the I-405 Project is part of a larger capital improvement program to maintain and improve regional sewer infrastructure.

About the Project

The Costa Mesa Sewer Rehabilitation Along the I-405 (Along the 405) Project will rehabilitate approximately 4 miles of the regional sewer pipeline that runs along the I-405 freeway in the City of Costa Mesa. The project will rehabilitate sewer pipelines, manhole structures, and improve manhole access. The project also includes the rehabilitation of several sewer pipelines that cross under the freeway.

Why Is This Infrastructure Needed?

OC San is committed to protecting public health and the environment by proactively maintaining its infrastructure. The project is needed to enhance aging infrastructure and extend the life of the regional sewer system.
